

Is your organization maximizing employee engagement?

Find out with an on-site assessment for only \$495*.

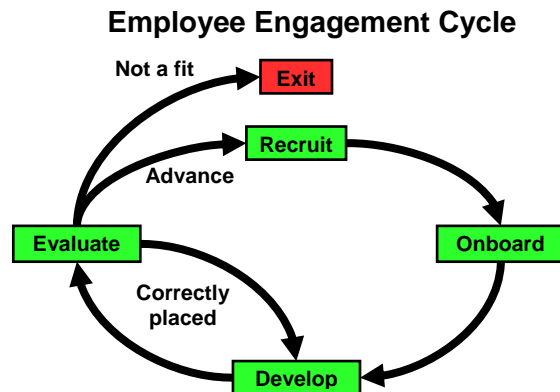

Overview

A 2006 Gallup survey found that only 27% of U.S. workers are engaged, meaning “energized and committed” at work. Worse, Gallup estimates disengaged workers cost companies an estimated \$300 billion in lost productivity each year.

The Employee Engagement Cycle

Aligning the five elements of the Employee Engagement Cycle with your organization’s mission, vision, and values can help you improve employee engagement and exponentially increase profitability.

Achieving alignment may be much more cost-effective than you imagine. Toister Performance Solutions can show you how to maximize employee engagement through a unique assessment.

©Jeff Toister & Dyana Berwin, 2006.

How it works

The whole process takes about two hours of your time. For most organizations, this is well-worth the opportunity to learn if you could add \$100,000, \$500,000, or even \$1,000,000 to the bottom line.

Step 1: You will be asked to gather basic financial data prior to the interview.

Step 2: We will facilitate a 90-minute interview with your key stakeholders.

Step 3: A comprehensive report will be emailed to you two business days later.
